

MARIMBA

Ensemble Series mallets come in five grades of hardness. These mallets are great for everyday practice and recommended for most ensemble play.

Concert Series mallets, with four grades of hardness, are designed for the performing marimbist. They are wrapped with a slightly looser tension than the Ensemble Series. The mallets produce a full rich tone and the bright white yarn adds to the visual effect of your performance.

Hemp Series mallets are tightly wrapped with 6 ply hemp cord and produce a very articulate tone. Hemp is the strongest natural fiber and makes these unique mallets very sturdy and may be used for concert or field percussion applications.

Made with 16.25" Birch handles.

VIBRAPHONE

Standard Series and **Hemp Series** vibraphone mallets are tightly wrapped with durable cord material. They have rubber cores with various layers of latex banding and each type is available in three grades of hardness. Made with 15" birch handles but available with upgraded rattan handles.

UNWOUND

FIELD SERIES

The **Unwound Series** consists of various shaped rubber and plastic heads to supply a wide range of tonal options and dynamic levels for all keyboard and auxiliary percussion instruments.

The **Field Series** keyboard mallets cover the full range of all keyboard percussion instruments. The mallets feature 11/32" thicker birch handles for added weight and durability.

TIMPANI

We offer two timpani mallet designs. Our **Traditional Felt Series** mallets are made with top quality German felt and cores made of cork to produce a rich and articulate tone.

The **Synthetic Series** mallets feature a soft, felt-like synthetic covering that is longer lasting than traditional timpani felt while the tone qualities are very similar. The lower price point and durability make them a great choice for students.

CONCERT BASS DRUM

Our **Concert Bass Drum** mallets are truly unique and an affordable option for school groups and student percussionists. They are covered with a durable felt-like synthetic material and produce a full rich tone.

MALLET PACKS

Mallet packs come with a stick/mallet bag and a collection of mallets to play all of the standard percussion instruments. There are two pre-selected combinations and we can make any custom combination of your choice.

SPECIALTY ITEMS

We offer a wide variety of specialty products for drummers of all styles. Cymbal, Drum Circle, Swizzle Sticks, Chopstix and Gong Mallets

HANDLE OPTIONS

Smith mallets come standard with satin finished birch handles that have been carefully sorted and checked for quality. All keyboard mallets are also available with premium rattan handles. The sticks are matched by pair for size and flexibility. Rattan diameters vary between 8mm-10mm. All marimba mallets are 16 1/4" long all other mallets are 15".
